Track 0 Financial Reserve Reconciliation Worksheet (‘QF-M5.1‘ ? P0)

Governing Law: Supreme Alignment Law (‘Law 0‘) & Golden Financial Invariant (‘QF-CAPITAL-01‘)
Governing Equation:

$$
R_{\text{verified liquid}} \geq 6O, \qquad O = O_{\text{household living}} + O_{\text{debt service}} + O_{\text{operating}}
$$

> **STRICT PRIVACY INVARIANT (‘QF-PRIVACY-01‘):**
> Never enter real personal dollar amounts into any Git-tracked file in ‘/home/quant/mycelium‘.
> Copy the JSON worksheet schema below to ‘~/.config/quantumflex/private/track0_worksheet.json‘ (‘chmod 0600‘), populate your verified statement figures offline, and run ‘scripts/reconcile_track0_reserves.py‘. The reconciler outputs **dimensionless coverage ratios only** (‘coverage_months‘, category share percentages, and pass/fail booleans) so raw household balances never enter Git, stdout logs, or dossier artifacts.

---

1. Verified Liquid Account Balances ($R_{\text{verified liquid}}$)

Include **only settled, unconditionally accessible, low-volatility cash equivalents** verified against current bank or brokerage statements:

Account Category	Eligible?	Example Instruments	Placeholder
Primary Checking (FDIC/NCUA insured)	**YES**	Household operating checking	‘$0.00‘
High-Yield Savings / Money Market	**YES**	Insured liquid reserve savings	‘$0.00‘
Settled Short-Term US T-Bills (‘<= 3 mo‘)	**YES**	TreasuryDirect / ‘SGOV‘ settled value	‘$0.00‘
Pending Bug Bounty Awards	**NO (Excluded)**	Unsettled Immunefi / Code4rena triage	‘$0.00‘ *(Excluded)*
Anticipated Public-Good Grants	**NO (Excluded)**	Unpaid NLnet milestones	‘$0.00‘ *(Excluded)*
Speculative / Illiquid / Retirement Assets	**NO (Excluded)**	Crypto tokens, options, locked 401(k), home equity	‘$0.00‘ *(Excluded)*

---

2. Outstanding Debts & Monthly Debt-Service Obligations ($O_{\text{debt service}}$)

Record every contractual monthly minimum or fixed payment required to remain in good standing:

Obligation	Principal Balance (Reference)	Required Monthly Payment
Mortgage / Rent Contractual Lease	‘$0.00‘	‘$0.00‘

Auto / Student / Personal Loans	‘$0.00‘	‘$0.00‘
Credit Card Minimum / Statement Payoff	‘$0.00‘	‘$0.00‘
Tax Installment / Estimated Reserve Obligation	‘$0.00‘	‘$0.00‘

---

3. Monthly Household Living Expenses ($O_{\text{household living}}$)

Use a conservative trailing 3-month average (excluding debt payments already counted in Section 2):

Living Expense Category	Monthly Baseline
Housing (Rent/Property Tax/HOA/Insurance if not in Section 2)	‘$0.00‘
Utilities (Electric, Heating, Water, Trash, Mobile/ISP)	‘$0.00‘
Groceries & Household Essentials	‘$0.00‘
Healthcare, Insurance Premiums & Wellness	‘$0.00‘
Transportation, Fuel & Maintenance	‘$0.00‘
Dependents / Loved Ones / Essential Buffer	‘$0.00‘

---

4. Committed QuantumFlex Monthly Operating Expenses ($O_{\text{operating}}$)

Verify the sovereign non-corporate operating-cost baseline (‘PA-LLC = RETIRED‘, ‘$0.00‘ cloud LLM spend):

Operating Line Item	Expected Sovereign Baseline	Monthly Committed Cost
External Paid Cloud LLM Inference APIs	**Must equal ‘$0.00‘** (‘127.0.0.1:11434‘ only)	‘$0.00‘
Corporate LLC Franchise / Registered Agent Overhead	‘$0.00‘ (‘PA-LLC‘ retired in ‘QF-SOVEREIGN‘ mode)	‘$0.00‘
Local Compute Electricity (‘qfx-yoga‘ + ‘g6pro‘, ~65W?95W)	‘~$7.50 ? $12.00 / mo‘ @ ‘$0.16/kWh‘	‘$0.00‘
Dedicated Network / Domain / Hardware Replacement Sinking Fund	Committed monthly allocation	‘$0.00‘

---

5. Six-Month Reserve Calculation

1. **Combined Monthly Obligations (O):**
$$O = O_{\text{household living}} + O_{\text{debt service}} + O_{\text{operating}}$$
2. **Required 6-Month Liquid Reserve Floor ($6O$):**
$$R_{\text{required}} = 6 \times O$$
3. **Verified Coverage Ratio (Dimensionless Months):**
$$\text{Coverage Months} = \frac{R_{\text{verified liquid}}}{O}$$
4. **Gate Condition:**
- ‘Coverage Months >= 6.0‘ $\implies$ ‘TRACK_0 = CLOSED‘ (eligible for ‘QF-A5‘ human signing ceremony).

- ‘Coverage Months < 6.0‘ $\implies$ ‘TRACK_0 = OPEN‘ (protect & rebuild Bucket 1 reserves; freeze discretionary capex; ‘ADMISSION_SIGNED = FALSE‘).

---

6. Offline Private JSON Schema & Verification Procedure

1. Create the private directory and ‘0600‘ file **outside** the Git repository:
‘‘‘bash
mkdir -p ~/.config/quantumflex/private
chmod 700 ~/.config/quantumflex/private
umask 077
cat <<’EOF’ > ~/.config/quantumflex/private/track0_worksheet.json
{
"schema": "qf.track0_worksheet.v1",
"reconciled_at_utc": "2026-10-30T22:30:00Z",
"operator_attestation": {
"operator_id": "rahshaun_chambers",
"operator_attested": true,
"statements_verified_against_primary_institutions": true,
"pending_awards_and_speculative_assets_excluded": true
},
"verified_liquid_accounts_usd": {
"checking_fdic": 0.0,
"savings_or_money_market_fdic": 0.0,
"settled_short_term_tbills": 0.0
},
"excluded_non_reserve_items_usd": {
"pending_bounties": 0.0,
"anticipated_grants": 0.0,
"speculative_or_illiquid_assets": 0.0
},
"outstanding_debts": [
{
"name": "primary_housing_or_loan",
"principal_balance_usd": 0.0,
"monthly_payment_usd": 0.0
}
],
"monthly_household_living_expenses_usd": {
"housing_non_debt": 0.0,
"utilities_and_connectivity": 0.0,
"groceries_and_essentials": 0.0,
"healthcare_and_insurance": 0.0,
"transportation": 0.0,
"family_and_contingency": 0.0
},
"committed_quantumflex_operating_expenses_usd": {
"external_cloud_llm_spend": 0.0,
"corporate_llc_overhead": 0.0,

```
}
}
EOF
chmod 600 ~/.config/quantumflex/private/track0_worksheet.json
```

2. Run the independent local reconciler (emits ratio-only evidence, zero dollar amounts):

```bash
.venv/bin/python scripts/reconcile_track0_reserves.py \
--input ~/.config/quantumflex/private/track0_worksheet.json \
--output build_check/track0_reconciliation_receipt.json
```

3. Verify ‘QF-A5‘ ceremony preflight readiness **without** premature signing:

```bash
.venv/bin/python scripts/prepare_qf_a5_ceremony.py --preflight
```
